

XL-TA35

302/442-to-552 Linking Cable

The XL-TA35 is an optional accessory for the 552 Five Channel Production Field Mixer. The TA5 to TA3 cable is designed to link Sound Devices 302 or 442 Mixers to the Sound Devices 552 Mixer. Linking is useful for applications requiring higher input channel counts. When the 552 is linked with 302 or 442 mixer, all input channels will be present on the stereo outputs of the 552. Return and PFL audio only appears in the headphone output of the mixer the action is performed on.

Connect the TA3F end of the XL-TA35 to either the 302 or 442 TA3M Tape Out/Mix Out connector. Connect the TA5F end of the XL-TA35 to the 552 TA5M Link I/O connector. Details on operation are provided in the 552 User Guide and Technical Information, located at:
